See you in Kuala Lumpur!

Asia plays a significant role in the battle against climate change due to its immense population base, robust economic development and strong long-term growth potential.

Currently home to almost two-thirds of the global population, Asia contributes to around 60% of global economic growth, and accounts for half of the world's greenhouse gas emissions.

The case of Asia is not the same for all as it diversifies across stages of economic development, varying climate related risks and transitional challenges. The pathways and pace taken by each economy differs, but all towards the common agenda to achieve sustainability.

What we do in Asia matters. It will go a long way in getting the world to Net Zero, if we can successfully transition Asia to a lower carbon future.

On the Agenda at Energy Asia

How would permanent structural changes driven by geopolitics and geo-economics impact policies and strategic direction?

Energy scenarios & strategic options in balancing the Energy Trilemma of security, transition & affordability

How can G2G collaboration be strengthened among the international community for a successful energy transition for the region?

New models of finance and investment to do it right & doing the right thing

Energy policies, regulations and incentives – building a framework that is effective, impactful, consistent and sustained delivery

Turning Net Zero commitments into business-building – clean & sustainable energy

Technologies to unlock decarbonisation pathways, does it exist and at what cost?

... and many more

Engage in this strategic discourse and provide actionable solutions by:

- Translating pledges into measurable targets
- Turning issues & challenges into business-building opportunities arising from energy transitions
- Developing ecosystems to achieve a just and responsible Net Zero future for Asia

About Energy Asia

Energy Asia advances the region's Net Zero ambitions by bringing together policy makers, industry captains and energy professionals through actionable solutions for a just and responsible energy transition.

Spanning three days from **26 – 28 June 2023** at the prestigious Kuala Lumpur Convention Centre, Energy Asia conference is poised to deliver riveting thought leadership discussions alongside a showcase of cutting-edge technologies and solutions.

Speaking at Energy Asia 2023

H.E. Arifin Tasrif

Minister of Energy and Mineral Resources
Indonesia

H.E. Haitham Al Ghais

Secretary General
OPEC

Amy Chua

President
SLB Asia

Russell Hardy

Chief Executive Officer
Vitol

Sunita Narain

Director General
Centre for Science and Environment
& Editor, Down To Earth

... and many others
