WHERE ASIA'S ENERGY FUTURE TAKES SHAPE

2 - 4 JUNE 2027
Kuala Lumpur, Malaysia

The Story of Energy Asia

Energy Asia was founded on a shared conviction - that Asia holds the key to shaping the world's energy future.

As the **Voice of Asia** in the global energy transition, the conference brings together policymakers, industry leaders and energy professionals to shape actionable solutions, forge transformative partnerships, and accelerate towards a just, inclusive and sustainable future.

Our story is one of bold ideas, real collaboration and measurable impact. **Join us and be part of the movement powering Asia's energy future.**

At Energy Asia, we stand firm that energy security and climate actions are not competing priorities but complementary agendas. As this region's energy demand is set to nearly double by 2050, we will need no less than the entire energy ecosystem to come together with synchronised and aligned efforts for a just and equitable transition where no community is left behind.

INPEX Corporation

Montri Rawanchaikul
CEO
PTT Exploration and Production
Public Company Limited (PTTEP)

“Energy Asia is more than just an industry gathering; it's a catalyst for action and an opportunity to learn from companies leading the way in delivering an energy security, affordability and sustainability. These companies and leaders that are building capabilities for a resilient future are doing so by embedding technology, data and AI across their enterprise, prioritising collaboration and innovation, and replacing people at the core of their reinvention.

Shell

Uwem Ukpung
Vice President of Global Services
AWS

“Africa and ASEAN have a unique business value proposition. There is a lot of ideas and design of technology and solutions that comes from these countries or nations that can be adopted globally. Africa and ASEAN should not just be passive adopters but designers and exporters of technology solutions helping building resilient energy systems that the rest of the world can use.”

Energy Asia Global Leadership Executive Forum

The Energy Asia Global Leadership Executive Forum is an exclusive, invite-only platform bringing together CEOs and C-suites from across the energy, finance, technology, and professional services sectors to shape strategies to accelerate Asia's energy transition.

Through high-level discussions and fireside chats, participants gain insights on four critical areas of action namely:

- Sharing of best practices to build resilient energy systems
- Reducing emissions while delivering social impact
- Enhancing project bankability to unlock capital flows and investor confidence
- Accelerating innovation and adoption of decarbonisation technologies

The logo for Energy Asia is displayed in a 3D, glowing green font. It is set against a background of a tunnel with a bright light at the end, creating a sense of depth and energy. The tunnel walls are dark, and the floor is also dark, with the light source at the far end creating a strong perspective.
